## DETAILED ACTION

### *Claim Objections*

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 7 been renumbered 6.

### *Claim Rejections - 35 USC § 101*

2. 35 U.S.C. § 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 4-6 are rejected under 35 U.S.C. § 101 because the claimed invention lacks patentable utility. The preamble of independent claim 4 states: "A method of measuring size and height of bubbles obtained for a drilling sample comprising:" However, none of the method step limitations following the preamble have anything to do with the actual "measuring" of any physical characteristics/dimensions of a bubble. The method steps only include, what appear, to be the preparation of the drilling sample (i.e. grinding, passing through sieves, statistical averaging of mass/weight, etc.) The claims must have a "useful, concrete, and tangible result," related to the preamble of the claim. This useful, concrete, and tangible result must be either specifically recited in the claim(s) or flow inherently therefrom.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant is invited to review PTO form 892 accompanying this Office Action listing Prior Art relevant to the instant invention cited by the Examiner.
